Every pound of waste you add to a landfill subtracts from your profits.

Imagine turning what you consider waste today into assets... the **Profitable Recycling for Business course will teach you how.**

The **Profitable Recycling for Business** course is a one-of-a-kind, online course designed specifically to teach businesses how to financially benefit through smart recycling practices. It's the essential course for business leaders who want to make going green both good for the environment— and good for their bottom line.

Profitable Recycling for Business

The **Profitable Recycling for Business** online course provides tips and tools to help you quickly develop a practical and profitable recycling strategy for your business.

Take **Profitable Recycling for Business** and learn how to:

- Find hidden costs in your waste disposal bills
- Reduce your waste disposal costs substantially
- Increase the amount and types of materials you recycle
- Find markets to sell high-value recyclable materials
- Haul and manage your waste cost-effectively

Learn Money-Making Recycling Secrets from Industry Experts

The **Profitable Recycling for Business** course offers a wealth of recycling trade secrets – secrets that most haulers don't want you to know, and most of which you won't find compiled in any one book, website or course currently offered.

Profitable Recycling for Business delivers:

- Self-paced and easy online learning
- Interactive and engaging content
- Essential computer-based education without leaving the office
- Low-cost learning with a high return

Don't miss out on our special introductory price of just \$249.00.
